- Wire Transfer:** Citizens Bank, One Citizens Drive, Riverside, RI 02915
Account # 113017-825-8
Outside U.S. use SWIFT CTZIUS33
Inside U.S. use FED WIRE 011500120

Money-Back Guarantee

If you are not completely satisfied with your purchase, call within 30 days for a full refund.

Licensing Options

Individual: The Individual license is intended for use by a single named user or on a single computer. It offers a choice between two activation types: Standalone Named User and Designated Computer.

Group: The Group license is intended for locations where an administrator manages a group of Individual licenses. It offers a choice between two activation types: Standalone Named User and Designated Computer. This license option requires a minimum of two licenses.

Network Named User: The Network Named User license is intended for use by a specified number of designated named users to run the product on any computer that is connected to a single FlexNet® license manager. It is the responsibility of the Licensee to maintain a list of specific user names. This license option requires a minimum of two named users.

Concurrent: The Concurrent license is intended for use by a specified number of concurrent users to run the product on any computer that is connected to a single FlexNet® license manager.

Activation Types

Standalone Named User: The products are used by a single named user. The products can be activated on up to four different computers, provided that the products are only accessible to and used by that single named user.

Designated Computer: The products may only be activated and used on a single, designated computer, provided the products are only operated from that computer's console by only one Licensed User at any given time.

License Term

Perpetual licenses provide the right to use the software indefinitely, and the first year of MathWorks Software Maintenance Service is included in the initial purchase price. After the initial 12 month period, an annual fee is required to renew your Software Maintenance Service.

*Software Maintenance Service

The first year of Software Maintenance Service is included with new product licenses. You can continue uninterrupted service in subsequent years by renewing your MathWorks maintenance subscription annually.

Your MATLAB® subscription must be current in order to add new products or additional users to a license and to receive the latest product versions. The annual subscription fee is calculated based on the products installed on your configuration and the license option acquired.

Software Maintenance Service provides:

- **Access to New Features:** Increase your effectiveness and efficiency by using new product features delivered in general releases twice each year.
- **Direct Technical Support:** Resolve technical issues and get technical solutions through telephone, e-mail, and Web assistance provided by specialized support engineers.
- **Online License Management:** View license details, manage user permissions, activate software, get passcodes for previous releases, and obtain order status.
- **Ability to Add New Products:** Extend your computing environment by adding products to your license at any time. A MathWorks maintenance subscription gives you access to the latest release to ensure compatibility with new versions of MathWorks products.
- **Bug Fixes:** Receive bug fixes via twice-yearly general releases and periodic Web updates, as well as interim solutions from Technical Support.

Maintain Your Investment

Because MathWorks ensures compatibility among products in the same release, a maintenance subscription ensures that you have access to the latest release and can add products to your license. If your subscription has lapsed three months (90 days) or more you incur back maintenance charges plus a reinstatement fee to receive the latest product versions. Staying subscribed is the most cost-effective way to get the latest advances and all the support you want.

Ineligible Programs

Not all Programs are eligible for deployment, compilation, distribution, or Web access. For Programs that are ineligible, see www.mathworks.com/ineligible_programs.

Additional Fees

The fees for the License are determined based upon the country where all Licensed User(s) are principally located. Additional fees may apply to a transfer of the License, or the principal location of any Licensed User, to another country.
